

Cyber secure IP video solution

Education and demonstration event

Thursday, September 29, 2016

9:00 am – 12:00 pm or 1:00 – 4:00 pm

Networking lunch 12:00 – 1:00 pm for all attendees

Crystal City Marriot

1999 Jefferson Davis Hwy

Arlington, VA 22202

Concerned about data security? Last year, more than 1,600 data breaches occurred throughout the world with over 75% of those happening in the United States. As more and more physical security devices touch the network, it is essential those devices are trusted and that the entire solution is resilient against attack.

Together, Bosch, Genetec™, and SecureXperts offer an IP video solution that is resilient against unauthorized access, malware, brute force cracking and other exploit techniques. This award-winning solution uses Credentialed High Assurance Video Encryption (CHAVE™) technology to ensure highly-secure identification and authentication through multi-factor smart card credentials.

Attend to learn about:

- ▶ Technology requirements for ensuring a trusted video surveillance solution
- ▶ How CHAVE™ technology ensures a cyber secure IP video solution
- ▶ The CHAVE™ solution's resilience against multiple types of attack

And, see a live demonstration of the CHAVE™ IP video solution

Seating is limited. Register now for one of these exclusive invitation-only events!
