

Bringing network infrastructure into The Genetec Security Center

Integrating AMG switches with the Genetec Security Center environment allows Genetec users to gain insights and control over their AMG industrial or commercial-grade switches. Now, the AMG570 and AMG510 series models are visible within the Genetec environment as native entities, offering control and alarm capabilities.

Visibility

Switch health monitoring.
Port & link status.

Control

Remote PoE port control.
Enable/disable ports.

Automation

Event-driven alarms.
Auto responses.

Savings

Fewer site visits.
Faster issue resolution.

Solving network issues faster than ever

Camera offline

Camera goes offline.

Alarm in Genetec

Network event triggers alarm in security center.

Remote PoE reset

Operator remotely resets PoE port from Genetec.

Camera restored

Camera and device back online.

No site visit

Issue resolved remotely, time and cost saved.
